

FAERÛN UNDER SIEGE

DICE MASTERS

Mike Elliott • Eric M. Lang

In **Dungeons & Dragons® Dice Masters: Faerûn Under Siege**, two players take on the role of masterminds directing the actions of a team of powerful heroes (represented by dice) to battle each other! Each turn, you roll your dice to see what resources you have available, buy more dice, send your team members into the field, and then strike at the enemy mastermind. Reduce the opposing mastermind's life to zero, and save the day!

COMPONENTS

Aside from these rules, this set includes:

- **44 Custom Dice**

- 12 Basic Action Dice (3 in each of 4 different colors)

- 16 Character Dice (2 in each of 8 types)

- 16 NPC Dice (white)

- **38 Cards**

- 24 Character Cards (3 versions for each of the 8 characters; NPCs have no cards)

- 10 Basic Action Cards

- 4 Color Reminder Cards

- **2 Dice Bags**

Additional cards and dice to expand your team can be found in foil packs — ask your retailer! High-quality playmats are also available for purchase, or you can download one from dicemasters.com and print it out yourself.

There are multiple cards available for each character die; you can choose which one you want to use!

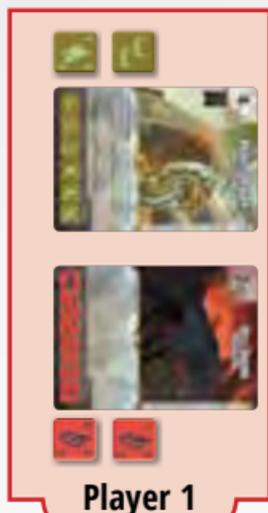

This lets you specialize your dice to suit your play style.

QUICK START

Ready for awesome fantasy action? Hope so! It's a smack-down of epic proportions—and you're in the middle of it!

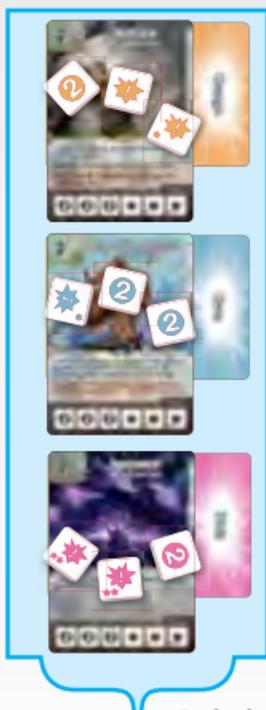

GETTING READY TO PLAY

Set up Player 1's heroes, Player 2's heroes, and the Basic Action Cards shown below:

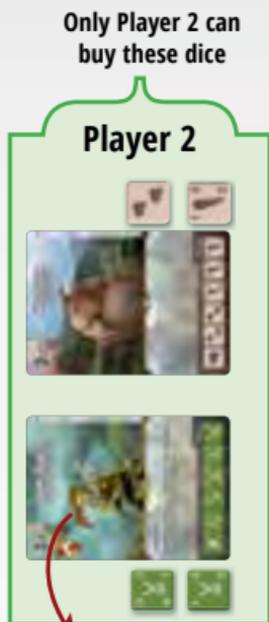

Player 1

Only Player 1 can buy these dice

Both players can buy dice from these Basic Action Cards

Player 2

Only Player 2 can buy these dice

For card anatomy, see page 5.

TIP: Use the playmat in the center of this rulebook to manage your dice!

LIFE: 10 • 9 • 8 • 7 • 6 • 5 • 4 • 3 • 2 • 1 • KO

Take a **bag** and put 8 NPC Dice (♀) in it. This is your starting collection! You start the game with 10 life. You win by reducing your opponent's life to 0!

HOW TO PLAY

Player 1 goes first. To take your turn, follow these five steps:

1. CLEAR AND DRAW STEP

If you have any dice in your Reserve Pool, they go to your Used Pile. Then, draw 4 dice from your bag and put them in your Prep Area.

If your bag runs out, put **all** the dice from your Used Pile in your bag, mix well, and keep drawing until you get a total of 4 dice.

2. ROLL AND REROLL STEP

Roll all the dice in your Prep Area. If you want, you can reroll any or all of them, but you must keep the new result!

Results will be energy (👊/🛡️/⚡/👁️/?/🎲) for purchasing characters/Basic Action Dice or a NPC (👤).

Move all the dice you rolled into your Reserve Pool.

3. MAIN STEP

Now you can do any or all of the following, in any order you want, as many times as you like:

PURCHASE DICE

Pay the energy cost in the upper left of the card (any Basic Action Card or your character cards) by “spending” dice from your Reserve Pool that show energy symbols. If you buy a die from a character card, **at least 1** energy you spend must match the symbol on that card (👊/🛡️/⚡/👁️).

The dice you spent and the die you buy all go to your Used Pile.

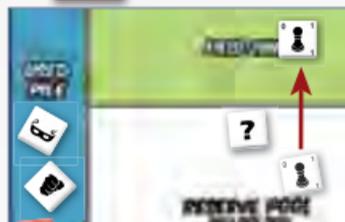

FIELD CHARACTERS

If you rolled a character face (👤) on any of your dice, you can put them into your Field Zone by paying energy equal to the number in the top left corner of the die—using any kind of energy.

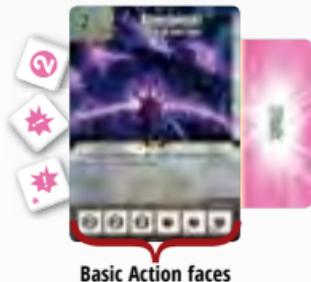

Sometimes, a character will have a special effect that takes place when you field it: just follow what the matching card says.

When you're done taking actions, move any dice with character faces that you didn't field to your Used Pile.

Most dice have three character faces denoted by small numbers in the corners.

Fielding Cost  Attack
Burst(s) (if any)  Defense
Custom Icon

PLAY ACTIONS

If you rolled an action face on one of your dice, move the die to your Used Pile and follow the instructions on the matching card. Generic (🎲) provides two energy, but of no particular type.

SPECIAL: BURST AND DOUBLE BURST

Sometimes, dice you have purchased (Character and/or Basic Action Dice) will show a burst (*) or double burst (***) symbol. That means that you *must* use the special power described on the matching card!

USE GLOBAL ABILITIES

Globals are game effects on cards that either player can use by paying the cost to activate them.

4. ATTACK STEP

Now it's time to send your characters to attack your rival!

Follow these four steps to attack:

DECLARE ATTACKERS

Any dice in your Field Zone can attack. You can use some, none, or all of them. Each attacker can be blocked by multiple blockers.

DECLARE BLOCKERS

Your opponent decides which of the characters in their Field Zone they want to block with: some, none, or all of them. Each blocker can only block 1 attacker, but multiple blockers can team up on a single attacker!

USE ACTIONS AND GLOBAL ABILITIES

Now the attacker can use action dice from their Reserve Pool, and **both players** can use Global Abilities.

ASSIGN DAMAGE

All attacking or blocking characters deal damage simultaneously:

A blocker does damage to the attacker it blocked.

A blocked attacker does damage to the blocker. If two or more characters blocked the same attacker, the *attacker* chooses how to divide the damage between the blockers.

If a character takes damage equal to or greater than its Defense, that character is KO'd and goes to its owner's Prep Area.

All unblocked attackers do damage to the defending player's life total.

If you run out of life, you lose the game!

For more information on the Attack Step, see page 13.

5. CLEANUP STEP

Blocked or blocking characters that were **not** KO'd return to their Field Zone.

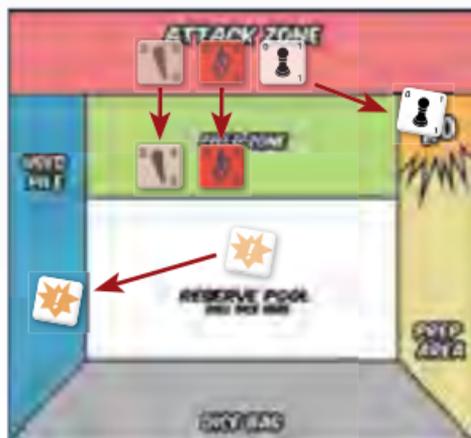

Unblocked attackers in the Attack Zone go to the Used Pile instead.

All damage to all dice is cleared.

Any unused action dice in your Reserve Pool go to your Used Pile.

All card effects end.

Now it's your opponent's turn!

You're ready to fight your first battle! If you have any questions about an ability or action, you can find the answers in this rulebook or at www.WizKidsEventSystem.com/bb.

CARDS

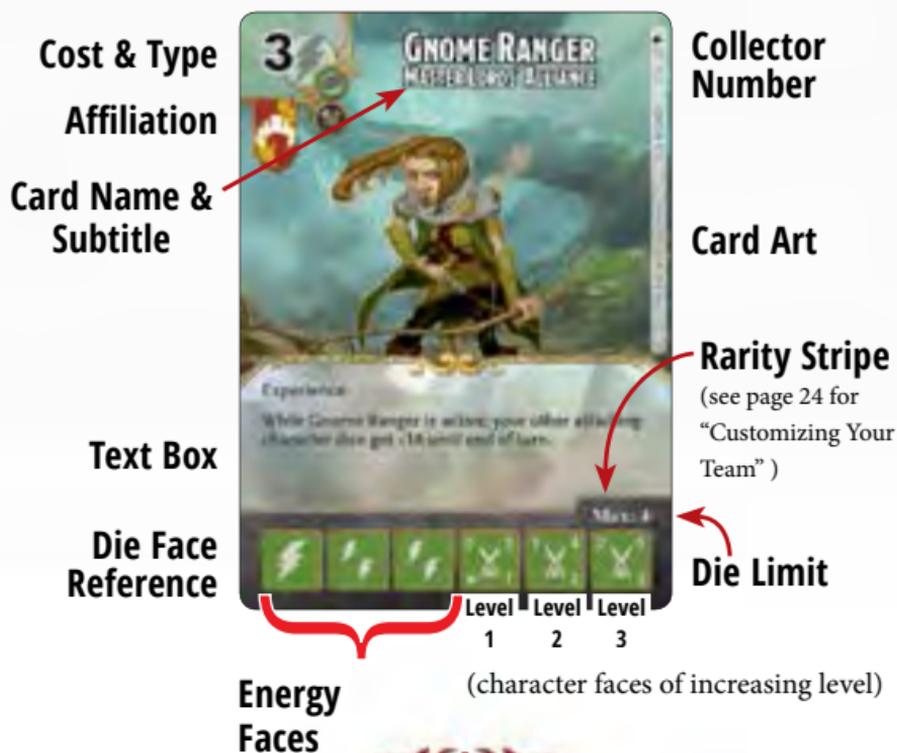

Each card details all the powers of one set of dice. Cards and their associated dice come in two types: **Characters** and **Actions**. Characters are named after people in the Dungeons & Dragons Universe (NPCs are the exception, and represent the people who have no special powers, but are nonetheless helpful), and their dice have numbers around the faces with a custom symbol. Actions are named for events or activities, and have no numbers around the die's custom symbol.

At the top center of the card is the card's **title** and **subtitle**. Most cards have several versions that are differentiated by their subtitle.

At the upper left of the card is the die's **cost** (a number) and **energy type** (a symbol of a Bolt ⚡, Fist 👊, Mask 🎭, or Shield 🛡️). Cards of a given energy type require that energy to be purchased, and provide that type of energy during play. Gnome Ranger (*shown in the diagram below*) is a Bolt character that costs 3. NPCs and Basic Action Cards have no energy type.

Below the cost and energy type, some characters have a team logo to identify their **affiliation** (action dice have no affiliation).

The affiliation is shown by the team's logo:

The **text box** in the center of the card details the die's abilities. Below that, the color of the **rarity stripe** provides information for collectors.

Directly below the rarity stripe, "Max: #" shows the **die limit**; that's how many of these dice you are allowed to have on a team. (Basic Action Cards have "Use:" because you always use a fixed number of them in every game.)

At the bottom, the **die face reference** shows the various faces of the die. Faces that provide energy are on the left, and character or action faces are on the right.

DICE

Each die consists of a unique combination of colors and graphics.

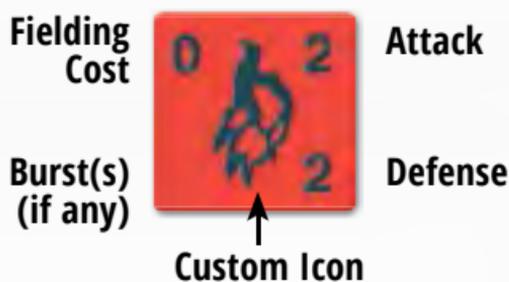

All dice have faces that generate energy. Energy faces have one or two of the special energy symbols on them. We talk more about energy on page 9.

The special sides on **Action Dice** have a **custom icon**, and some have one or two burst symbols on them.

Action Dice never have numbers.

Character Dice have a custom icon and may have burst symbols, but they always have several numbers that define the character's basic abilities.

The number in the top left is the **fielding cost** of the die. This is how much energy you must spend to send the die into the field where it can engage the forces of your opponent.

The top right is the die's **attack**; this is how much hurt it dishes out. On card text, a die's **attack is abbreviated as A**.

The bottom right shows the die's **defense**; how much damage it takes to knock the character out. On card text, **defense is abbreviated as D**.

The bottom left may have one or two **burst** symbols (*). These activate special abilities on dice, if any are listed. If no burst abilities are listed on the card, the burst has no effect.

Dice on their energy faces can move from your Reserve Pool to pay for costs. If they do that during your turn, they go Out of Play (they are moved to your Used Pile at the end of the turn). If it isn't your turn, they go straight to your Used Pile.

SETUP

How you set up depends on whether or not this is a demo game (for you or a friend). If you're just learning or teaching a new player, you should give the setup below a try. If you're an experienced Dice Masters player, feel free to skip ahead to **Customizing Your Team** on page 24 of this booklet.

A DEMO GAME

For this demo game, place the following Basic Action Cards in the center of the Play Area:

- **Barkskin**
- **Blink - Transmutation**
- **Banishment**

Put a set of three Basic Action Dice on each of those cards (it doesn't matter which color, but this example will refer to them as if you had used orange, cyan, and pink in order). Place the Orange Dice Reminder Card under **Barkskin** with the label sticking out from the top or side of the card. Do the same with the Cyan Dice Reminder Card and **Blink - Transmutation**, and the Pink Dice Reminder Card with **Banishment**. These cards will help players remember which dice represent which card when all the dice on a Basic Action Card have been purchased.

Basic Action Cards can be used by either player, no matter who brings them! In this demo game, we don't specify who brought them anyway.

Decide who goes first by flipping a coin or rolling a die (one player could call energy or character while the other player rolls the die). The player who wins the coin toss or die roll can choose to go first or second. Each player gathers the cards listed below and the two dice that match them. Every character in this starter has three versions, so be sure to grab the right one based on the subtitle.

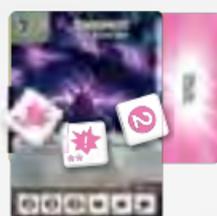

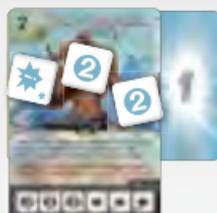

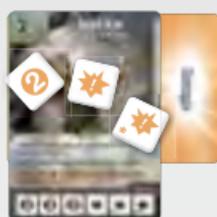

- First Player: **Bronze Dragon: Apprentice Dragon** and **Hell Hound: Minion Fiend**
- Second Player: **Hill Giant: Minion Giant** and **Gnome Ranger: Master Lords' Alliance**

Each player places their cards, each with their two matching dice on their side of the table. These cards, unlike Basic Actions, can only be purchased by the player whose cards they are. The Play Area should look like the diagram on page 8.

Finally, each player takes 8 of the NPC Dice (this starter comes with 16) and places them in one of the dice bags (this starter comes with 2). Each player will start the game with 10 life for this demo game.

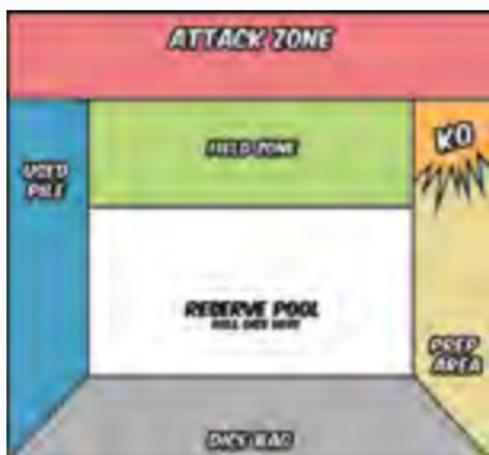

When you're set up, the table should look sort of like this:

PLAY AREAS

There are several distinct areas where you place your dice to indicate what they can and can't do for you.

The Bag: One of the two dice bags provided (or your own bag). This is where you draw dice from. If your bag is ever empty, and you need to draw a die, move all dice from your Used Pile into your bag and shake it well to mix the dice thoroughly.

Prep Area: This area holds dice that you'll roll during your Roll and Reroll Step in addition to the dice from your draw. This is where KO'd dice go.

Reserve Pool: This area holds dice that you have rolled but have not yet done anything with. Dice on energy faces here can be spent, dice on action faces can be used for their effects, and dice on character faces can be fielded.

Field Zone: This is where characters go. Sometimes you'll be paying their fielding cost to get them here, other times you'll be using their abilities from here.

Attack Zone: This is a special part of the Field Zone. It's where your characters go when you assign them as attackers or blockers. Characters in the Attack Zone are also in the Field Zone.

Out of Play: Nothing can happen to dice here. Energy spent during your turn goes here, as do Action Dice you use during your turn or unblocked characters.

Used Pile: Dice here have been used up. At the end of your turn, all dice Out of Play are moved here. When you spend energy during your opponent's turn, it goes directly here. Dice here are returned to your bag when you would try to draw a die but cannot.

HOW TO PLAY

First we'll outline the basic structure of the game. Later we'll have more detailed rules that should be referenced when questions arise.

Each player has a certain amount of life points at the start of the game (this is 10 points in the demo; when you play a full game, you'll have 20 life). Keep track of your life total with a method of your choice, like a piece of scrap paper, or use the track in the center of this booklet.

During the game, you'll want to purchase Character Dice and Action Dice. Character Dice can be sent to the field to attack your opponent, they can stay in your Field Zone to block, or sometimes they can even use special abilities. Unblocked characters can damage your opponent, reducing his or her life. When you reduce your opponent's life to zero, you win!

ENERGY

Dice can produce energy. The NPC Dice you start with can produce all different types of energy; some dice will even produce more than one energy. Energy allows you to buy additional dice, pay to field characters, and pay for **Global Abilities** (we'll explain all these soon).

There are four types of energy:

- Fist
- Bolt
- Mask
- Shield

In addition, some other die faces provide energy:

- Wildcard (?) – may be used as any type of energy
- Generic (2) – provides two energy, but of no particular type
- Doubles – some faces will provide two Fists, two Masks, etc. by showing two of that symbol

CARDS AND DICE

NPCs have no cards associated with them. Basic Action Dice can be paired with any of the Basic Action Cards and an Indicator Card.

All other dice are associated with a few cards. Before playing, you'll choose one of those cards to use with each type of die. The card gives a variety of details about the die, such as its cost, its special abilities, and its faces in order.

Characters have levels (normally three). These levels are the die faces that show the die's custom symbol and the character stats. The leftmost character die face shown on the die's card is level 1. The level increases by one for each face moving to the right. In the top left of each character face is a number: that is the cost to field that character. In the top right is that character's attack (abbreviated as **A** in card text). Below a character's attack is its defense (abbreviated as **D** in card text).

BURST SYMBOLS

Many dice have a burst symbol (✱) or two burst symbols (✱✱) in the lower left corner of one or more of their faces. These burst symbols indicate that the die might activate a special effect. When you roll a face that has one or two burst symbols on it, you must apply the matching text on the card (you can't choose not to). If there is no corresponding text on the card, then the burst symbol has no effect.

TURN ORDER

Players alternate taking turns. During a player's turn, that player goes through the following steps in order. Once a step is completed, a player cannot go back to it in the same turn.

1. CLEAR AND DRAW STEP

Move all dice still in your Reserve Pool to your Used Pile. Since they were never used, they do not go Out of Play, but move directly to your Used Pile.

Draw four dice from your bag. If your bag has fewer than four dice, draw all of them, then place all the dice from your Used Pile into the bag, shake the bag well, and continue drawing until you have drawn four dice in total. Sometimes, cards or abilities will make you draw more dice: draw those additional dice now. Place all dice drawn into your Prep Area.

If, after refilling the bag, you are only able to draw four dice or fewer, lose one life and gain one generic energy for each die less than four that you drew. For example, if you only drew three dice from the bag, you would gain one generic energy and lose one life.

2. ROLL AND REROLL STEP

Roll the dice you drew from the bag as well as all of the dice that were already in your Prep Area (that were placed there in an earlier turn).

After you have rolled your dice, you may choose to reroll any or all of them. When rerolling, you select all of the dice to reroll at once, and you reroll them as a group.

You do not get a second reroll opportunity even with dice that you did not choose for your first reroll.

Once you have rolled (and possibly rerolled), move all of your dice from the Prep Area to your Reserve Pool, keeping the same face up.

3. MAIN STEP

During this step, you may purchase dice, activate Global Abilities, field characters, and use Action Dice. You can do these multiple times and in any order; for example, you could purchase a die, use an action, field a character, and then purchase another die.

SPENDING ENERGY

To pay energy during your turn, move dice showing that much energy from your Reserve Pool to Out of Play. Those dice will go to your Used Pile during Cleanup. You can also pay energy during your opponent's turn, but that energy goes directly into your Used Pile. You can't choose to spend energy for no reason.

PURCHASING A DIE

On your turn, you can purchase any combination of dice you like. You can purchase dice from the Basic Action Cards in the center as well as from the cards on your side of the table.

To purchase a die, you must pay its purchase cost in energy. If the card shows that it is a certain energy type, at least **one of the energy used to pay that cost must be that type of energy**.

*Example: Gnome Ranger: Minion Harper, has a cost of 4 and is a ⚡ character. You can buy a Gnome Ranger die with a ⚡ and three 🍄, or a ⚡, a 🍄, and 🍄 etc. Basic Action Dice have no energy type next to their cost; you can use any type of energy to pay for **Barkskin**, for example.*

Bought dice go to your Used Pile.

If you have a die that produces two or more non-generic energy, you may partially spend the die's energy by spinning it down to a face that reflects the unused portion of the die's energy. For example, if a die face shows 🍄🍄 you may use the 🍄 and another energy to purchase a 🍄 die that costs two and change the face on the die to a face that

GAME TIP: For dice that provide an ongoing bonus, you can move them into the field as a reminder. Just move them to the Used Pile at the end of your turn, or when moving your Used Pile into your bag.

shows . This only applies to symbol dice and not dice that produce generic energy. For generic energy dice, any unused portion that is not immediately spent is lost. However, you can purchase multiple dice simultaneously to spend a generic die completely.

USING A GLOBAL ABILITY

Some cards have Global Abilities printed in red text on them. These effects are always available, whether or not a die from that card is in the field. You can use a Global Ability listed on an opponent's card even though you cannot purchase a die from that card.

During a player's Main Step, both players can use any or all Global Abilities available. To use a Global Ability, you must pay the energy cost, moving the die or dice used to pay that cost to your Used Pile (unless it's your turn, then they are Out of Play). In many cases, these effects may be used more than once if the cost can be paid multiple times. As with purchasing dice, you can partially spend non-generic energy. If both players want to use a Global Ability at the same time, the player whose turn it is goes first.

PLAYING ACTIONS

You may use the action faces on your Action Dice during your Main Step. To do so, apply the effect and then move the Action Die from your Reserve Pool to Out of Play (it will go to your Used Pile at the end of the turn). It costs no energy to use an Action Die.

Basic Action Dice

FIELD CHARACTERS

It costs energy for you to send your Character Dice from your Reserve Pool to the Field Zone, though in some cases, that cost is zero.

When you field a character, you must pay energy equal to the character's fielding cost as shown in the upper left corner of the die. This cost can be paid with any type of energy, even generic. As with purchasing dice, you can partially spend non-generic dice, and you can pay more than one cost at once to fully spend a generic-energy die. You cannot field a character if you cannot pay the energy cost.

Dice used to pay for a fielding cost are moved Out of Play and can't be targeted by character abilities, Action Dice, or Global Abilities.

You are not required to field a die if you do not wish to. Any characters that you do not field (because you can't or choose not to) by the end of the Main Step go to your Used Pile (they do not go Out of Play, since they were never used).

4. ATTACK STEP

After you have completed all of your activity in the Main Step and moved leftover characters from your Reserve Pool to your Used Pile, you are ready to attack. During the Attack Step, the attacking player can use any Action Dice still in the Reserve Pool. In addition, both players can use Global Abilities whenever appropriate; for example, they can use Global Abilities that react to damage or other effects when that happens. All other Global Abilities can be used after blockers are declared. The Attack Step has the following parts, in order:

DECLARE ATTACKERS

Any or all of your fielded characters can attack. Move these characters into the Attack Zone. It costs no energy to move a character into the Attack Zone; it is just a part of the Field Zone. You can send all, some, or none of your characters to attack. If you do not attack, your turn immediately ends (neither player can use Global Abilities in this case).

After you declare all attackers, apply any effects that happen due to characters attacking.

DECLARE BLOCKERS

Your opponent declares blocking characters, moving them into the Attack Zone and assigning each one to block a specific attacker. Your opponent can block with all, some, or none of his or her characters.

A single blocker can only block one attacking character: it can't block more than one. However, more than one blocker may be assigned to block a single attacker.

After all blockers are declared, apply any effects that take place due to blocking or being blocked. As is the case with all ties, the player whose turn it is (the attacker) resolves first, then the defender.

USE ACTIONS AND GLOBAL ABILITIES

The attacking player can use Action Dice and Global Abilities; the defending player can use Global Abilities. If both players have such effects that they wish to use, the attacking player gets to go first. Once both players are finished, move on to assigning damage.

Action Dice that go the Field Zone are considered used when placed in the Field Zone.

ASSIGN DAMAGE

Both players assign damage. Damage occurs simultaneously. (In the rare case where it is relevant, the attacking player assigns first, although damage still resolves simultaneously.)

Each attacking character that was blocked assigns its Attack Value in damage to the character(s) blocking it. If more than one character is blocking an attacking character, the attacker can choose how to divide

LIFE: 20 • 19 • 18 • 17 • 16 • 15 • 14 • 13 • 12 • 11 • 10 • 9 • 8 • 7 • 6 • 5 • 4 • 3 • 2 • 1

the damage between the blockers (and can even assign all the damage to one and none to the other). An attacking character must assign all of its damage. Likewise, each blocking character assigns damage equal to its Attack Value to the character it blocks. Damage dealt to a character in excess of its defense has no effect.

Attacking characters that were unblocked (or those with the appropriate special ability) assign damage to the defending player instead of a character. That damage will be deducted from the player's life total.

Unblocked characters are moved Out of Play after dealing damage, before any other effects resolve other than those that would replace damage. They'll go to the Used Pile during Cleanup.

Once all damage has been assigned, knock out each character that took damage greater than or equal to its Defense Value. When a character is knocked out, move it to that player's Prep Area. If game effects are generated by a character taking damage or being knocked out, the attacking player resolves all effects first, then the defender.

5. CLEAN UP STEP

Characters that were KO'd (by damage from an attacker, damage from a blocker, or some other effect during the Assign Damage Step) are sent to the Prep Area.

Characters that blocked or were blocked but not KO'd return to the Field Zone.

All damage to all dice is cleared. All effects end (except "While active" and "effects that occur at the end of turn"). Actions still in a player's Reserve Pool move to the Used Pile (unless they're on an energy face). Only dice showing energy faces can remain in the Reserve Pool.

The turn ends. Move all of your dice from your Out of Play Zone to your Used Pile.

WINNING

As soon as your opponent's life reaches zero, the game ends and you win! If both players would reach zero at the same time, the game ends in a tie.

EXAMPLE OF PLAY

Katie and Reese sit down to play a game using the Demo Game setup. Katie won the coin toss and gets to go first.

They both start with 10 life.

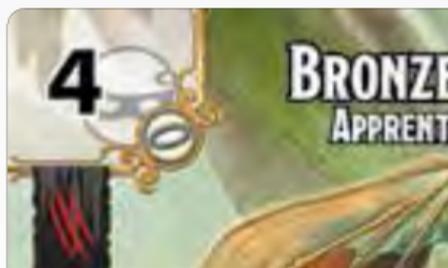

- First Player (Katie): **Bronze Dragon: Apprentice Dragon** and **Hell Hound: Minion Fiend**
- Second Player (Reese): **Hill Giant: Minion Giant** and **Gnome Ranger: Master Lords' Alliance**

KATIE, TURN 1

Katie draws four dice from her bag (all NPCs) in her Clear and Draw Step. She rolls them in her Roll and Reroll Step, getting:

Katie would like to purchase her **Bronze Dragon**, so she makes a point of rerolling the  in order to try and get a fourth energy. She rerolls her  too, since she needs to get a . After her reroll, Katie has:

Katie will be able to purchase her **Bronze Dragon: Apprentice Dragon** die. She knows that **Anti-Breath Weapon** won't be useful against Reese's team, but **Bronze Dragon** has big stats that she hopes to use to win. She moves a **Bronze Dragon** die from her card to her **Used Pile**. She'll skip her **Attack Step** since she has no characters in the **Field Zone**. She has no energy in her **Reserve Pool** to use during Reese's turn. She moves her dice from **Out of Play** to her **Used Pile**.

REESE, TURN 1

Reese draws four dice (all NPCs) in his Clear and Draw Step. He rolls them in his Roll and Reroll Step, getting:

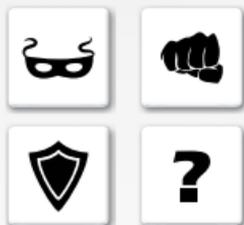

Reese couldn't have hoped for a better roll. He'll field his NPC die and purchase his Gnome Ranger die this turn. He won't

even have to reroll to do both! During Reese's Main Step when he buys the Gnome Ranger die, he adds it to his Used Pile. He isn't going to pursue Basic Action Dice yet. He fields his NPC for free, but in the Attack Step, decides not to attack, and keeps the die as a potential blocker. At the end of the turn, all the dice in Reese's Out of Play Zone move to his Used Pile.

KATIE, TURN 2

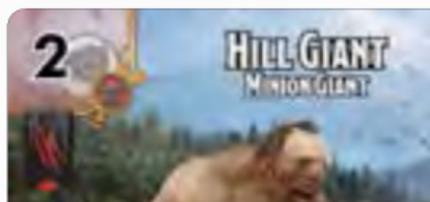

Katie draws four dice (again all NPCs) in her Clear and Draw Step. She rolls them in her Roll and Reroll Step, getting:

Katie could either purchase her remaining Bronze Dragon die or both of her Hell Hound dice. She decides to purchase both Hell Hound dice. They are moved to her Used Pile when she purchases them. When she refills her bag next turn, three of those dice will be Character Dice!

REESE, TURN 2

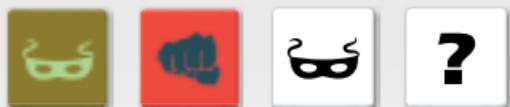

Reese rolls the last four NPC Dice in his bag, and after the Roll and Reroll Step has the following:

He was hoping for a NPC instead of a fourth energy so he could get another blocker and another Gnome Ranger die, but he figures he'll make the most of his  energy and purchase both of his Hill Giant dice. Going into Katie's turn he'll have a single NPC as a blocker.

KATIE, TURN 3

Katie knows this could be a big turn for her. She has no dice in her bag, so she refills her bag with the 11 dice in her Used Pile (eight NPC Dice, and three character dice). She mixes the dice in her bag thoroughly, and draws two NPC Dice, a Hell Hound die, and a Bronze Dragon die to roll the following:

Since she has no characters she rerolls to get:

She fields the Hell Hound for free and pays both of her energy to field the Bronze Dragon.

Katie knows that Reese won't be able to block both of her characters with only one NPC. She attacks with Bronze Dragon and Hell Hound, hoping that she can finish off Reese next turn with a lucky roll!

Since Reese can't block both of her characters, he blocks the Bronze Dragon to preserve as much of his life total as possible. His NPC is KO'd, Hell Hound goes to the Used Pile, and Bronze Dragon returns to the Field Zone since it wasn't KO'd. Reese will get to roll his NPC next turn in addition to the dice he draws from his bag. Just the thing for a comeback!

TOURNAMENT RULES

Once you've mastered the basics, this section provides details and additional rules.

FUNDAMENTAL RULES

Card text always supersedes basic rule text. Unless otherwise stated, game effects can only target Character Dice that are in the Field Zone. The Attack Zone is considered part of the Field Zone.

If two cards directly conflict, the one that says "you can't" beats the one that says "you can."

You cannot avoid paying costs. For example, if the cost of something is spinning a die down one level, and all you have are level 1 characters that can't be spun down, you cannot pay that cost.

A player cannot gain life beyond the game's starting amount. Excess gains are wasted.

POWERS, ABILITIES, AND CARD TEXT

Card text that names a character only considers your characters for its effects. Your card's text doesn't trigger because your opponent has the same character, nor do your dice get a bonus from your opponent's cards of the same name.

Unless otherwise specified, card effects and bonuses end at the end of a turn.

BONUSES AND DAMAGE

Damage dealt to a character remains on that character until the end of the turn (or the character is KO'd). In the Cleanup Step of each player's turn, all damage clears.

Bonuses are listed as a modifier either to attack ("A") or defense ("D"), thus a bonus of +1D would add one to a character's defense. Add all bonuses together before applying the total modifier to the die's stats. Bonuses cannot reduce a number below zero. However, if a die's defense is reduced to zero, it is KO'd (because it has taken damage greater than or equal to its defense of zero).

Once gained, bonuses last until the end of the turn.

FREE TO FIELD CHARACTERS

Usually Character Dice need to be fielded or in the Field Zone to use their game text. Character Dice that field themselves for free are an exception to this, so you won't need a copy in the Field Zone to field a second copy of the die for free.

BURSTS

Bursts are the stars that appear in the lower left-hand corner of the die face. Note that a single burst result is different from a double burst result.

If you roll a burst symbol, the first thing to do is check to see if the die's card has a matching burst symbol: one burst only matches one burst, two only matches two, and the ***/**** text matches both one burst and two bursts. If your card does not have the matching number of burst symbols on it, nothing happens.

If your card does have the matching symbol, then those special effects happen. Burst effects are mandatory, not optional. If your die has a burst symbol but your card doesn't, ignore the burst.

ACTIVE AND FIELDDED

When game text says, "While ___ is active," that means "When one or more of this card's dice are in the field." In other words, when dice of that character have been fielded, the effect on the card takes place. It takes place only once, no matter how many copies of that die are fielded.

The term "when fielded" refers to the moment you send a Character Die from your Reserve Pool to the Field Zone. It does not refer to assigning the die to attack, since the Attack Zone is still considered part of the Field Zone. Likewise, "when fielded" does not refer to characters returning to the field from the Attack Zone, nor does it refer to moving a captured or controlled die from your opponent's field to yours. Moving dice as part of an effect is not the same as fielding them. If **Gnome Ranger: Minion Harper** reads, "When fielded, deal 2 damage to target character die." then you would do that each time you field an Gnome Ranger die (even if it is more than once during the same turn).

PREVENTING AND REDIRECTING

Some powers prevent a game effect (damage, drawing a die, etc.). This includes cards that "take no damage." When an action is prevented, all of the effects of that ability are canceled, and that effect can no longer be reacted to. Costs for that ability are not refunded.

Other powers redirect a game effect (usually damage). When an effect is redirected, the target of the effect changes from its original target to the new one as described in the game text, even if that target was not a legal one for the original effect. The source of the effect remains unchanged from the original.

TIMING CONFLICTS

If there is a conflict of timing (e.g., both players want to use an ability simultaneously), the person whose turn it is always resolves their effects first. If simultaneous effects are controlled by the same player, that player chooses the order of those effects.

Once activated, an effect is always resolved entirely before the next effect begins. You cannot use an effect after your opponent starts an effect but before it resolves. The only exception to this is when an effect redirects or prevents damage, but those situations are clearly spelled out in the card text.

In tournament play, the active player takes as many sequential actions as desired (from zero to all possible actions) before pausing and indicating that the inactive player can take an action. The inactive player can then either perform an action or decline the opportunity. Then the active player can take more actions.

If the inactive player passes, and then the active player passes, no more actions can be taken during that step (except for reactions to damage, as usual).

This structure is only used for initiating a game effect. Players are allowed to use Global Abilities that react to events at the appropriate time (for example, a Global Ability that allows you to redirect damage when one of your characters takes damage).

MORE ABOUT DICE

Rolled dice in the Field Zone or in your Reserve Pool are considered to be whatever their face is. If you have a NPC Die in the Reserve Pool showing energy, then it's an energy die. If you have a NPC showing the character face in your field, then it's a Character Die.

Dice in your Used Pile, Prep Area, and bag are not considered rolled dice. Their dice type is either character or action, based on what faces they have. Dice are always affiliated with the team specified on their cards (if they're Good, Evil, etc.).

Dice that leave the table or end up cocked must be rolled again.

REROLLING DICE

Many powers allow you to "reroll" a die. When you reroll a die, it stays in the same area it was in unless (a) otherwise specified by the card text for the resulting face, or (b) it's in a location that the die face cannot be (for example, an energy result in the field). If the die face cannot be in the specified location and its fate is not specified in the card text, move the die to the Reserve Pool.

CAPTURING, CONTROLLING, AND COPYING

When you capture a die, move the captured die to your Field Zone and place your capturing die on top of it. The captured die no longer exists for game purposes. Once the capturing ends, place the die wherever it came from (the text on the capturing die's card will tell you where you captured it from). Unless otherwise noted, capturing ends at the end of the turn, or when the capturing die is KO'd.

When you take control of a die, it becomes yours for game purposes. Move it into your field and place it on top of the die controlling it. Your controlling die cannot attack, but can send the controlled die to attack (controlling another mind takes a lot of effort). If the controlled die is of a character that you also have (e.g., you take control of a **Gnome Ranger: Minion Harper** die when you have a **Gnome Ranger: Master Lords' Alliance** card on your side of the table), the controlled die still continues to reference your opponent's card. If the controlled die is sent to your Prep Area or Used Pile, it goes to your opponent's Prep Area instead. Otherwise, when your control of the die ends (at the end of the turn or when your controlling character is KO'd), return the controlled die to your opponent, placing it in whatever area you took it from. Your die (that was controlling the other die) remains where it was.

Copying means that your die takes on the stats and/or abilities of another die. If the text says, "copy the stats," then the die copies the numerals of the other die, including any benefits that die may have by virtue of a burst symbol. Your copying die also gets to retain its own burst symbol for extra game effects. If the text says, "copy the abilities," the die uses the opposing die's card as if it were its own. When a die copies another die, the text that references the die's name applies to the copying die as well.

LEVELS AND SPINNING

Characters have levels (normally three levels, although a NPC Die has only one); these are the die faces at the bottom of a card that show the die's custom symbol and the character stats. The leftmost character die face shown is level 1, and the level increases by one for each face (thus the next die face on the card to the right of the level 1 die face would be level 2). **Note that a die face's level is different from its fielding cost.**

Some abilities have you take a die and spin it up or down a level. To do this, check the card and locate the face corresponding to your character to determine its level. Then set the die face up one level or down one level using the character card as a guide. If an effect causes a character to spin up one level, move it to the next face to the right on the card. Characters that are already at their highest level cannot be spun up. If an effect causes a character to spin down one level, move it to the next character face to the left. Unless specified, a character cannot spin down from level 1 to a non-character face.

USING GLOBAL ABILITIES

During the Main Step and Attack Step, both players can use Global Abilities. In many cases, Global Abilities may be used more than once if the cost can be paid multiple times. As with purchasing dice, you can partially spend non-generic energy. Global Abilities that are paid for in a batch resolve as a single effect.

During the Main Step, the active player can use a Global Ability as one of the actions available. The other player can also initiate a Global Ability (that is, use one that is not a reaction to something else happening) after each action that the active player takes during the Main Step (purchase, field, etc.).

However, in cases where both players wish to use Global Abilities at the same time (e.g., one player is trying to use a Global Ability to KO a character, and the other wants to boost the character's defense), the active player always takes precedence. Remember: while it's fine to play loose in casual play, tournament play requires a stricter procedure.

If a Global Ability prevents or redirects damage, then the damage inflicted on the original target no longer exists and cannot be reacted to.

CUSTOMIZING YOUR TEAM

There are 142 different cards in the set of Dungeons & Dragons Dice Masters: Faerûn Under Siege. Each card is marked with its collector number in the upper right-hand corner of the card. More cards and dice can be found in expansion packs from this set and others!

RARITY

Each expansion pack has cards of different rarities, each with a matching die. Common cards (including all the ones found in this set) have a gray border above the die index (Gnome Ranger on page 5 is a common card). Uncommon cards have a green border, and rare cards have a yellow border. The super-rare cards have a red border. Blue bordered cards are promo cards.

PLAY VARIANTS

Once you've mastered the rules and expanded your collection, you'll want to try these variants. However, regardless of which variant you use, you always start each game with eight NPC Dice. No more, no less. You cannot buy more, nor can you get rid of them.

RAINBOW DRAFT

Rainbow Draft is a draft format unique to Dice Masters that allows players to use Basic Action Cards they already own along with dice from 12 foil packs of Dice Masters to build a team.

Find complete details on Rainbow Draft at <http://dicemasters.com/rainbowdraft.pdf>

TOURNAMENT TEAMS

For tournament competition, each player starts with 20 life and 20 dice. For fun games, feel free to use 15 life and 15 dice instead. Each player will choose two different Basic Action Cards and up to eight character and/or action cards. While you can use heroes and villains together, or characters from different teams, you can't use two cards with the same name (even if they have different subtitles). For example, if you choose **Bronze Dragon: Apprentice Dragon**, you cannot also choose **Bronze Dragon: Master Dragon**. Your 20 dice can be distributed among your eight cards however you like, as long as no individual card has more than the maximum number of dice listed on it. Each card must have at least one die.

In official play, reveal all the cards and dice you chose at the same time as your opponent.

DICE MASTERS DOUBLES

Dice Masters Doubles lets you play Dice Masters in a 2 vs 2 format! It gives players a new Dice Masters experience for constructed play. Each team will have 30 life, and each player gets to bring four cards with up to their maximum number of dice and a Basic Action Card with six dice. For complete details on this format, please see <http://dicemasters.com/dicemastersdoubles.pdf>

LEXICON

Abilities: The text on the die's associated card.

Action Die: A die that has no character faces. A face on such a die that shows the special graphic (✱) and can be used for a powerful effect.

Active: An effect that takes place when one or more of that card's dice are in the Field Zone.

Adventurer: An adventurer is any character with the Experience ability.

Anti-Breath Weapon: When a character die with Breath Weapon X attacks, you may pay X energy to prevent that damage.

Assign: To commit your characters to attack, or to block an attacking character. Also, to designate how a character's Attack Value is dealt as damage to targets in an Attack Step.

Attack: To send your characters to try to damage your opponent.

Breath Weapon: When a character die with Breath Weapon X attacks, you may pay X energy. Deal X damage to your opponent and all of their character dice. You may use multiple Breath Weapons in a turn, but only one per character (no matter how many copies of that die are attacking).

Burst: A star-shaped symbol (✱) that indicates extra abilities may be in effect for a die.

Capture: To place under your die.

Cleave: If a die with Cleave attacks and KO's a blocking character die with combat damage, they deal half of their A (rounded down) to another character die your opponent controls as combat damage (only once).

Combat Damage: The damage a Character Die deals during the Attack Step as a result of attacking or blocking.

Continuous: Actions with Continuous move from the Reserve Pool to the Field Zone and can stay there at the end of the turn. Sometimes they'll send themselves to the Used Pile for an effect whenever you could use a Global Ability.

Engaged: A character blocking or being blocked is engaged with the opposing character.

Energy Drain: After blockers are assigned, spin each character engaged with a character die with Energy Drain down one level. Character dice at level 1 can't be spun down.

Equip: Gear dice with Equip are put in the Field Zone. When fielded and at the start of each turn, you may attach it to a character die that has (⊗) icon on their card, even if it is already attached. If the character this die is attached to leaves the Field Zone, this die stays in the Field Zone.

Experience: While a character die with Experience is active, if you KO an opposing monster (as noted by the black Monster allegiance banner) during your turn, place one Experience token on this character die's card at the end of your turn. Each Experience token provides each of this card's dice with +1A and +1D (at each level). A card can only gain 1 Experience token per turn (unless otherwise stated). Multiple cards can each gain an Experience token during the same turn. An opposing player who KO's their own Monster will not generate Experience tokens.

Fabricate: Characters with Fabricate will have 2 numbers (X-Y). If you KO X characters with total purchase cost Y or more, you can purchase the die with Fabricate X-Y for free.

Face: One side of a die.

Fast: Characters with Fast deal combat damage before other characters, all at the same time, instead of at the regular time for combat damage.

Field Zone: The area where your characters go when you pay for them to fight your opponent.

Gate: If you field a die with Gate Balor, you could take an unpurchased Balor die from one of your cards and roll it. On a character face, you can place the unpurchased die into your Prep Area. Sometimes a die can Gate in a type of die (like a fiend). In that case, you may select any qualifying die.

Global: A game effect denoted within the text box of a character by the keyword "Global:". The effect happens if the prerequisite energy cost is paid for. A Global game effect is available for both players to use even if they do not have that die available for them to purchase.

Opposing: Owned or controlled by the other player.

Overcrush: When attacking, if this character KO's all of its blockers, it deals any leftover damage to your opponent.

Spin: To turn or rotate a die so that it shows a different face.

Stats: The numbers on a Character Die face.

Swarm: While a die with Swarm is active, if you draw another copy of that die from your bag during your Clear and Draw Step, draw and roll an extra die from your bag. You do this for each matching die with Swarm drawn from your bag.

When Fielded: An effect that takes place when you pay a character's fielding cost or field them through an effect.

While Active: See Active.

TURN SUMMARY

A turn consists of the following:

Clear and Draw Step

Move all energy dice from your Reserve Pool to your Used Pile.
Draw four dice from your bag; refill it from the Used Pile if necessary.

Roll and Reroll Step

Roll the four dice you drew plus any in your Prep Area.
Reroll (all at once) any of those dice that you wish.

Main Step

A player may do these as many times as they like in any order.

Field characters by paying energy equal to their fielding cost.

Use Action Dice. Place them Out of Play when finished.

Purchase dice by paying energy equal to the cost. Place them in your Used Pile.

Both players can use Global Abilities.

At the end of this step, move any unfielded characters to the Used Pile.

Attack Step

Select attackers. Resolve effects that occur due to attacking.

Assign blockers. Resolve effects that occur due to blocking.

Use Action Dice. Place them Out of Play when finished.

Both players can use Global Abilities.

Assign and resolve damage. Resolve effects that occur due to damage or KO.

Cleanup

Move unblocked attackers to the Used Pile.

End all effects and clear all damage.

End turn. Move dice from Out of Play to the Used Pile.
